

IN THE SPECIFICATION

In the Final Office Action, the Examiner recommended that Applicant amend the Specification to recite “computer readable program storage devices” without adding new matter. Please amend the Specification as follows:

In page 8, paragraph ¶[0026], please insert the following after the sentence ending in “...a computer, a telephone, set top box, a network appliance, gaming console, entertainment device, or any device capable of connecting to the network 145 and receiving identity active content.”:

“As would be known to one of ordinary skill in the art, having the benefit of this disclosure, a sender peer 110 and/or a recipient peer 120 may comprise computer readable program storage devices. The sender peer 110 and/or a recipient peer 120, as would be known to one of ordinary skill in the art, having the benefit of this disclosure, may comprise computer readable program storage devices such as floppy disk drives, compact disc read-only memory (CD-ROM) devices, digital video disc (DVD) devices, universal serial bus (USB) storage devices, flash drives, tape drives, external storage devices, and/or the like, along with their respective media.”

Applicant respectfully submits that this addition to the Specification does not add new matter, rather this addition clarifies, at the Examiner’s request, what “computer readable program storage devices” may be.
